*Plant Cell, Tissue and Organ Culture* **70:** 337–340, 2002.

**CONTENTS Volume 70 2002**

**Volume 70 No. 1**

**Special Issue on the New Zealand Regional IAPTC & B Conference 2001**

**Guest Editors: John F. Seelye, Garry K. Burge, Ed R. Morgan & Geert-Jan M. de Klerk**

**Introduction**
J. Seelye 1

**Gene technologies in *Pinus radiata* and *Picea abies*: tools for conifer biotechnology in the 21st century**
C. Walter, J. Charity, L. Grace, K. Höfig, R. Möller, A. Wagner 3–12

**Opportunities for synthetic plant chimeral breeding: Past and future**
G.K. Burge, E.R. Morgan, J.F. Seelye 13–21

**Using education as a public relations tool for biotechnology**
M.L.B. Styles 23–26

**Long-term expression of the *gus*A reporter gene in transgenic cyclamen produced from etiolated hypocotyl explants**
M.R. Boase, G.B. Marshall, T.A. Peters, M.J. Bendall 27–39

***Agrobacterium tumefaciens*-mediated transformation to alter ethylene and cytokinin biosynthesis in broccoli**
N.E. Gapper, M.J. McKenzie, M.C. Christey, R.H. Braun, S.A. Coupe, R.E. Lill, P.E. Jameson 41–50

***Agrobacterium*-mediated transformation of *Pinus radiata* organogenic tissue using vacuum-infiltration**
J.A. Charity, L. Holland, S.S. Donaldson, L. Grace, C. Walter 51–60

**Alternative selectable markers for potato transformation using minimal T-DNA vectors**
P.J. Barrell, S. Yongjin, P.A. Cooper, A.J. Conner 61–68

**Factors affecting transformation of cell cultures from three dicotyledonous pigment-producing species using microprojectile bombardment**
S. Deroles, M.A.L. Smith, C. Lee 69–76

**Efficient transient transformation of suspension culture-derived apple protoplasts**
R. Maddumage, R.M.W. Fung, I. Weir, H. Ding, J.L. Simons, A.C. Allan 77–82

**Selection of rice for iron toxicity tolerance through irradiated caryopsis culture**
R. Pathirana, W.A. Wijithawarna, K. Jagoda, A.L. Ranawaka 83–90

**Differential gene expression between pigmented and non-pigmented cell culture lines of *Daucus carota***
G.B. Marshall, M.A.L. Smith, C.K.C. Lee, S.C. Deroles, K.M. Davies 91–97

**Autotetraploid tangor plant regeneration from *in vitro Citrus* somatic embryogenic callus treated with colchicine**
J.-H. Wu, P. Mooney 99–104

**An *in vitro* approach to investigate medicinal chemical synthesis by three herbal plants**
M.A.L. Smith, H. Kobayashi, M. Gawienowski, D.P. Briskin **105–111**

**Bushiness and cytokinin sensitivity in micropropagated *Zantedeschia***
S.M. D'Arth, S.I. Simpson, J.F. Seelye, P.E. Jameson **113–118**

**Mutation induction by $\gamma$ and X-ray irradiation in tissue cultured lotus**
S. Arunyanart, S. Soontronyatara **119–122**

**Volume 70 No. 2**

**Special Issue: Adventitious Regeneration**

**Guest Editors: Thomas Geier, Max-Bernhard Schroeder & Geert-Jan M. de Klerk**

**Introduction**
T. Geier, M.-B. Schroeder, T. Marks **123**

**Variation in potato microplant morphology *in vitro* and DNA methylation**
S.M. Joyce, A.C. Cassells **125–137**

***In vitro* morphogenic potential of differently aged *Pinus radiata* trees correlates with polyamines and DNA methylation levels**
M.F. Fraga, M.J. Cañal, R. Rodríguez **139–145**

**Applicability of the co-inoculation technique using *Agrobacterium tumefaciens* shooty-tumour strain 82.139 in silver birch**
T.S. Aronen, J.H. Häggman, H.M. Häggman **147–154**

**Loss of DNA methylation affects somatic embryogenesis in *Medicago truncatula***
D. Santos, P. Fevereiro **155–161**

**The use of *Agrobacterium rhizogenes* transformed roots to obtain transgenic shoots of the apple rootstock Jork 9**
N. Pawlicki-Jullian, M. Sedira, M. Welander **163–171**

**Phytohormone contents in *Corylus avellana* and their relationship to age and other developmental processes**
H. Andrés, B. Fernández, R. Rodríguez, A. Rodríguez **173–180**

**The beneficial role of different auxins and polyamines at successive stages of somatic embryo formation and development of *Panax ginseng in vitro***
C. Kevers, T. Gaspar, J. Dommes 181–188

**A role for polar auxin transport in rhizogenesis**
T.R. Marks, Y.-Y. Ford, R.W.F. Cameron, C. Goodwin, P.E. Myers, H.L. Judd **189–198**

**Adventitious shoot regeneration from vegetative shoot apices in pear and putative role of cytokinin accumulation in the morphogenetic process**
E. Caboni, S. D'Angeli, A. Chiappetta, A.M. Innocenti, H. Van Onckelen, C. Damiano **199–206**

**Effect of sucrose on adventitious root regeneration in apple**
A. Calamar, G.-J. de Klerk **207–212**

**Induction of vessels in cotyledons of *Lycopersicon esculentum* by exogenously applied plant bioregulators**
L. Wang, R. Wyndaele, P.B. Gahan **213–221**

*Research note*

**Adventitious shoot regeneration and appearance of sports in several azalea cultivars**
G. Samyn, S. De Schepper, E. Van Bockstaele **223–227**

**Volume 70 No. 3**

*Reviews of Plant Biotechnology and Applied Genetics*

*Commentary*

**Molecular markers in crop improvement: Present status and future needs in India**
P.K. Gupta, J.K. Roy **229–234**

*Regular articles*

**Sisal plant regeneration via organogenesis**
S.K. Hazra, S. Das, A.K. Das **235–240**

**Growth and carbohydrate changes in shoot cultures of *Dioscorea* species as influenced by photoperiod, exogenous sucrose and cytokinin concentrations**
E.P. Chu, R. de Cássia Leone Figueiredo Ribeiro **241–249**

**Stable transformation of *Pinus radiata* embryogenic tissue by *Agrobacterium tumefaciens***
F. Cerda, F. Aquea, M. Gebauer, C. Medina, P. Arce-Johnson **251–257**

***In vitro* culture of *Cedrela fissilis* Vellozo (Meliaceae)**
E. da Costa Nunes, C. Volkmer de Castilho, F.N. Moreno, A.M. Viana **259–268**

***In vitro* propagation of *Asparagus maritimus* – A rare Mediterranean salt-resistant species**
N. Štajner, B. Bohanec, M. Jakše **269–274**

**Stepwise decrease of 2,4-D and addition of BA in subculture medium stimulated shoot regeneration and somatic embryogenesis in buffalograss**
S.-Z. Fei, T. Riordan, P. Read **275–279**

**Induction of somatic embryogenesis and adventitious shoots from immature leaves of cassava**
G. Ma, Q. Xu **281–288**

***In vitro* production and identification of autotetraploids of *Scutellaria baicalensis***
S.L. Gao, B.J. Chen, D.N. Zhu **289–293**

**Efficient $GA_3$-assisted plant regeneration from cell suspensions of three grape genotypes via somatic embryogenesis**
V.A. Zlenko, I.V. Kotikov, L.P. Troshin **295–299**

**Micropropagation, callus and root culture of *Phyllanthus urinaria* (Euphorbiaceae)**
E. Catapan, M. Luís, B. da Silva, F.N. Moreno, A.M. Viana **301–309**

**Effects of tissue culture conditions during embryoid multiplication on the incidence of "mantled" flowering in clonally propagated oil palm**
C.J. Eeuwens, S. Lord, C.R. Donough, V. Rao, G. Vallejo, S. Nelson **311–323**

*Research note*

***In vitro* micropropagation of *Piper longum* – an important medicinal plant**
E.V. Soniya, M.R. Das **325–327**

**Book review**
M.-B. Schroeder **329**

**Instructions for authors** **331–333**

**Author index** **335**

**Contents Volume 70** **337–340**
